

Figure: University of Texas diabetic wound classification

University of Texas Diabetic Wound Classification		How deep is the wound?			
		Grade 0	Grade 1	Grade 2	Grade 3
Is the wound infected? Ischaemic? Or both?	Stage A (No infection, no ischemia)	Epithelialized wound	Superficial wound	Wound going through to tendon or the joint capsule	Wound going through to bone or joint
	Stage B	with infection	with infection	with infection	with infection
	Stage C	with ischemia	with ischemia	with ischemia	with ischemia
	Stage D	with infection and ischemia	with infection and ischemia	with infection and ischemia	with infection and ischemia
